

REPORT FOR API TESTING OF TAXPAYER APP
FROM THE DEPARTMENT OF (ICT)
OF PENETRALIA HUB LIMITED

TO THE GENERAL MANAGER
OF PENETRALIA HUB LIMITED
ABUJA

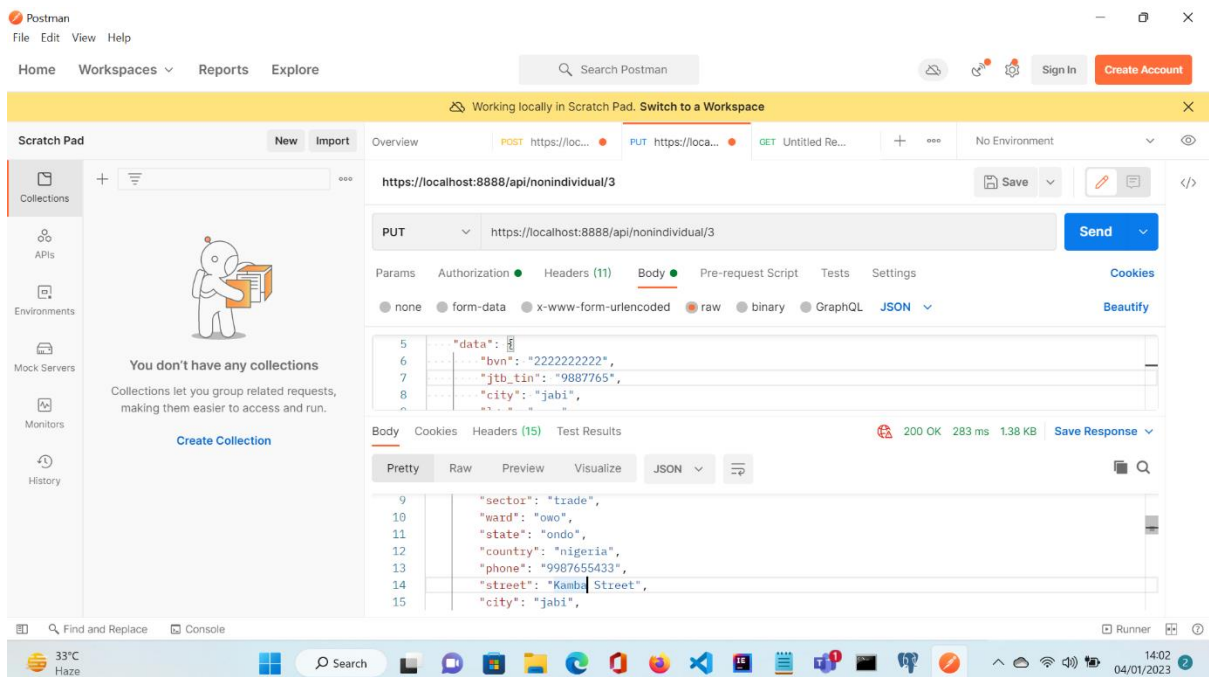

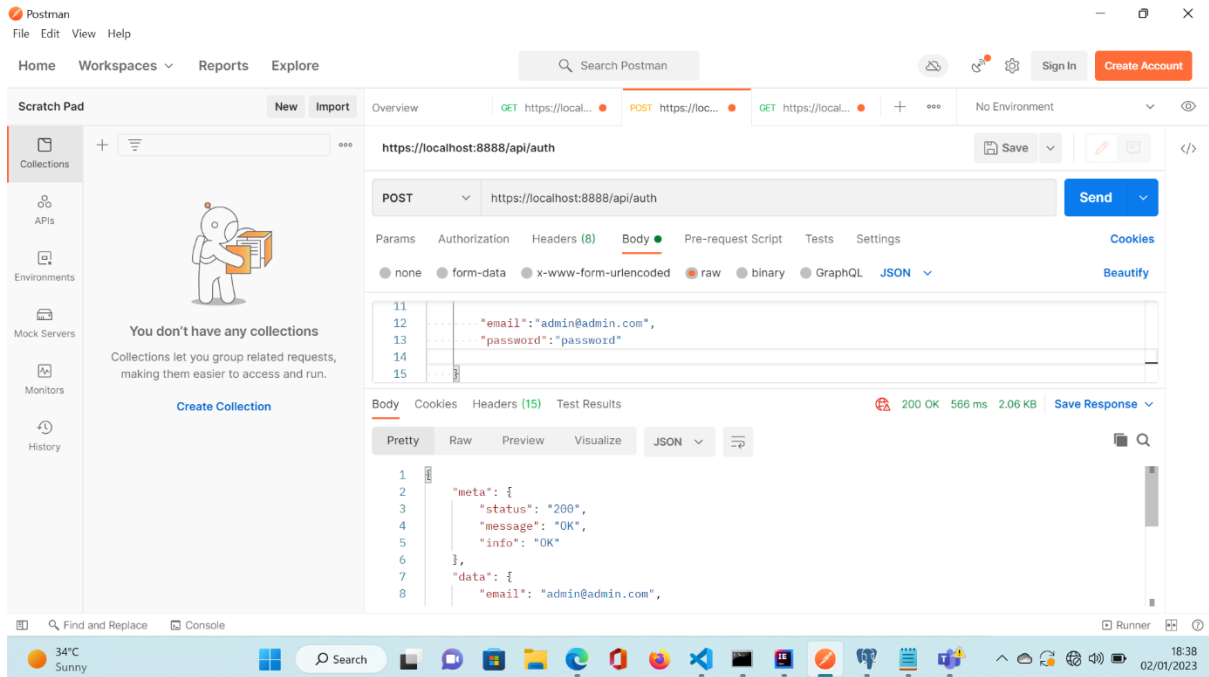

Am Engr Rotimi Michael James , am writing on behave of ICT Department the report for testing integrated API , which start from last weeks and end this weeks , the department study the API documentation carry by Engr Rotimi , which follow along with the process for the proper API testing and also give the application understanding for correction .

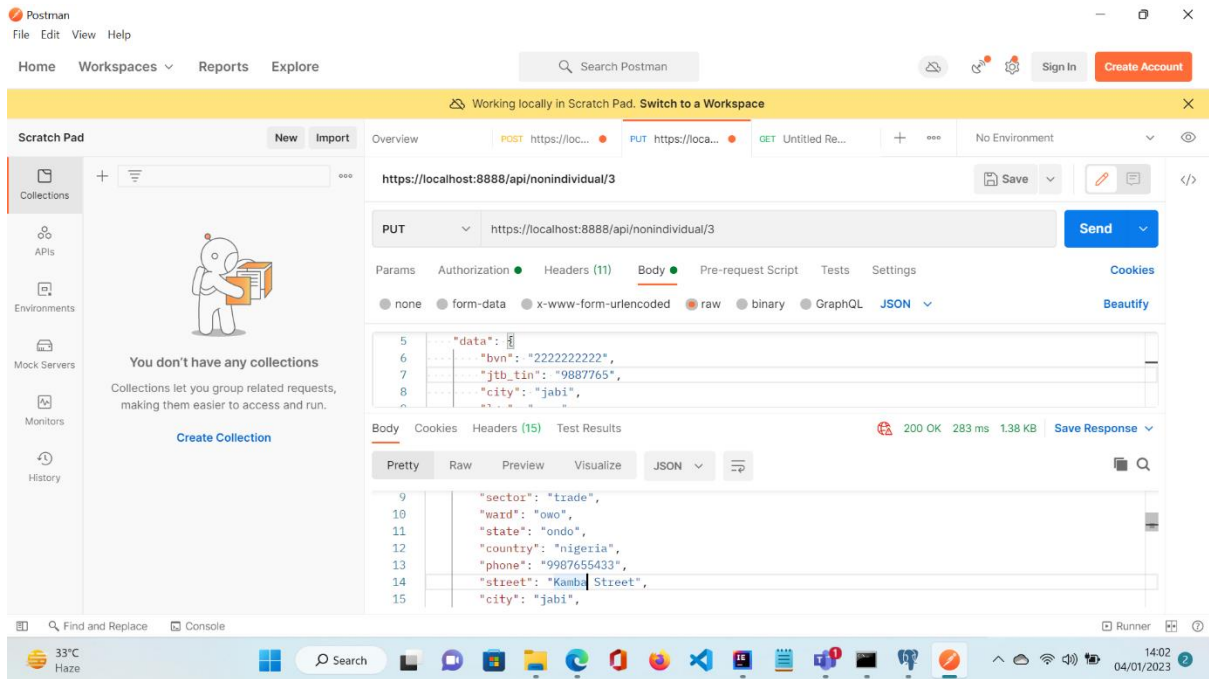

This are the process involve in the API testing studying all the method of request involve are POST, GET, PUT, DELETE which of this method have there response according to there parameter which work in hand with the API path called URL in the directory of the End point.

After so many work put together the testing of all integrated API was successful , all API testing STATUS CODE is 201 , come to

STATUS CODE any code from 200 to the range of 200+ read successful .

Examples of successful image :

And many more of this images sample .

The department also look into making the department server active, which is part of what the department want to achieve this week , and also running the network cable through ceiling from the ICT department to the network router in order to provide access to the company server as local network called local server, which is about to be completed this week .
